### RESEARCH AWARDS - PAST

1. R01HD085793	Principal Investigator
NIMH/NICHD	09/10/2015
Social Media Messaging for HIV Testing in Zimbabwe	
This study makes a significant public health impact by examining an innovative strategy to increase the number of high-risk adolescents receiving HIV screening and then subsequently be linked to prevention, care and treatment services. The research study examines the efficacy of a peer-driven, social media HIV-testing campaign through the use of social networks.

	Identity Stress and Health in Three Cohorts of LGB Individuals			
	Lesbian, gay, and bisexual (LGB) youth continue to suffer disparities in health outcomes compared with their heterosexual peers. Social changes have significantly altered the developmental trajectories of today's LGB youth, requiring that we reexamine our knowledge of stress and health in this population. This knowledge is required for improving provision of health services interventions and achieving PHS goal of reducing health disparities related to sexual orientation.
