

2022-2023 PROGRAM GUIDE: Master of Public Health – Health Promotion

Information in this document is updated annually. Please refer to the document for the year you entered the program. Student resources, policies, and procedures applicable to all School of Public Health graduate students can be found on the SPH website, www.ohsu-psu-sph.org.

Overview

<https://ohsu-psu-sph.org/mph-health-promotion/>

The Health Promotion program is an interdisciplinary course of study providing students with specialized training in public health promotion and education. Through coursework and community-based experiences, students learn to address factors in the broader social, economic, policy, and built environments to improve the health of populations. In this track students build practice and research skills for population-level intervention, including program development, implementation, and evaluation. The curriculum further offers opportunities to focus on health across the lifespan. Graduates of the Health Promotion track will be able to effectively recognize and assess health disparities, communicate health information, promote health equity, and mobilize resources for social change.

Program Competencies

Students graduating from the MPH: Health Promotion (HP) degree program will be able to:

- Apply theory in the development, implementation, and evaluation of health promotion interventions, programs, and policies.
- Develop interventions and programs to effect change at multiple levels, including individual, community, organizations, and policy.
- Design and implement strategies to promote health.
- Solicit and integrate input from community and organization stakeholders.
- Design and deliver health communication messages.
- Evaluate and interpret results from program evaluations and other research.
- Define research problems, frame research questions, design research procedures, and outline methods of analysis.
- Apply ethical principles that govern the practice of public health.
- Demonstrate cultural competency in health promotion among all social and cultural communities.

MPH Health Promotion: Recommended Course Sequence

Below are the recommended course sequences for full-time MPH Health Promotion students and dual-degree MPH/MURP and MPH/MSW students. Other schedules are possible. However, *every SPH program has a quarter in which its students are prioritized for registration for certain (required) courses*. It is important that you register promptly, and that you make every attempt to follow the term-by-term course plans laid out below, as your program has priority registration for required courses specified during those terms.

Priority registration is only open for a limited period (typically 3 weeks). Once priority registration ends, students from other programs may register for these courses. While there is some flexibility to take courses in alternate terms, *we can only hold space for you during your prioritized registration term, during the priority registration period*. If you wait to register until after the priority period, or decide to take a course in another term, we cannot guarantee you a spot.

Always consult your Faculty Advisor regarding your program of study and course selection to determine the schedule that fits best for you. If you receive federal financial aid, it is important to be aware of financial aid requirements when planning your schedule. Federal loan require at least 1/2 time enrollment (5 credits). Please refer to the OHSU's "[Financial Aid Explained](#)" and the [Standard Enrollment Plan](#), paying particular attention to summer term, for more information. Dual degree students should consult [PSU's Office of Financial Aid](#) instead.
